# FOR DAY OF **TEMPERANCE**

# Plan Series of Meetings.

(From Wednesday's daily.)

The Anti-Saloon League proposes to make January 39th a day for the contemplation of temperance problems by the people of the city. The entire day will be given over to the discussion of matters relating to the traffic of liquor, and from early morning until night.

matters relating to the traffic of liquor, and from early morning until night there will be heard arguments against the dominance of the saloon.

It was planned at first to make the affair one of great magnitude, using the Central Union Church for the mass meetings, and seeing, too, that it was filled, but this was abandoned so that there might be greater freedom than in a church meeting, and the Young Men's Christian Association hall was finally chosen as the scene of the morning and night meetings. The afternoon gathering will be one of peculiar interest, in that it will be held at the close of business hours, in a central place, the old Chamber of Commerce room, over the offices of Castle & Cooke, and the speakers will all be

The early morning meeting will be one given over in great part to a consideration of the general work of the league, and the state of the mental and physical health of the community, in the presence of so great a number of saloons. The meeting it is expected will be largely addressed by the clergy, and the attendance will be of the church folk who are thought to be ready to give up something of business for a contemplation of the results of the liquor traffic.

At 4 occlose in the afternoon there.

I weeklis has come to a standstill, owing to the failure of the Walopae Ranch (Raupo (Mokulau)) (285 economy on the part of those at a low-level or the average daily mean seal Hamoa Plantation (60 scale, 10.00 representing an assumed annual mean, and 9.82 the actual annual mean, and 9.82 the actual annual mean for nine years previous to Nulla (Erchwon) (1901). The mean for 1901 has been 10.17. Paia 180 the liquor traffic.

At 4 occlose in the afternoon there

the liquor traffic.

At 4 o'clock in the afternoon there will be held the business men's meeting. This will draw, it is expected, heavily from those who are not accustomed to attend such gatherings. To interest this class of persons the program has been chosen with great care. There will be an analysis of prison statistics by Warden Henry, of Oahu prison. This will be an address which will be very full of the results of intemperance during the recent period, when the number of saloons has been on the increase. Governor Dole will discuss the question from the standpoint of the official, and W. A. Bowen will talk of the business side of the problem. There will be one other speaker, who will talk of temperance, but his name has not been made public as yet. This meeting will be entirely in charge of business men.

The evening meeting will be address, ed by W. P. Castle will will such as yet. This meeting will be address, ed by W. P. Castle will give a part of the official will be deficial and the problem. The revening meeting will be address. The evening meeting will be address, and the liquous trainfall throughout the group on the part of the official, and W. A. Bowen will talk of the business side of the problem. There will be one other speaker, who will talk of temperance, but his name has not been made public as yet. This meeting will be entirely in charge of business men.

tirely in charge of business men.

The evening meeting will be addressed by W. R. Castle, who will give a summary of the work of the friends of temperance, and will discuss the local situation from that standpoint. It is understood that Mr. Castle has prepared a showing of the saloon growth and the number of persons who have been compelled to suffer by reason of the use of liquor. In many ways it is intended that this shall be the principal address of the day, and that it shall in a way represent the sentiment of those who are making the struggle against the saloons of the Territory.

The Anti-Saloon League hopes to secure such interest that there will be greater attention given to the dangers

greater attention given to the dangers of saloons in the residence district, and that the community will be aroused so that the work will find greater support in the future.

## WILL ADVERTISE

An official handbook of Hawaii is soon to be issued by the Territory for soon to be issued by the Perritory for distribution among the various States and Territories of the United States. Secretary Cooper is to be its author, and it will be scattered broadcast among public institutions which now favor Hawaii with their publications.

Material for the work, which is to be unusually complete and comprehen-sive, is now being collected by Secre-tary Cooper. He has sent out letters to scores of citizens of the Territory whom he hopes to enlist in his effort to make the handbook as representa-tive of Hawaii as it is possible for it

The volume will probably be issued about the first of March if the necessary data can be secured by that time. It will consist of 200 pages, probably with illustrations, and neatly bound. It is to be in a way supplementary to the annual report of Governor Dole, con-taining much information concerning taleing much information concerning the Territory which the report to the Secretary of the Interior does not permit. Secretary Cooper outlined in a general way yesterday the plan and nature of the work which the Territory is to issue. It will combine, of course, reports from the heads of the different departments within the Territory, containing also statistics and different departments within the Territory, containing also statistics and other matter of like nature. Incorporated in it will be figures showing the amount of collections, expenditures, information relative to shipping, taxes, vital statistics, election returns, laws, etc. There will be also a historical sketch of the various forms of governments.

### METEOROLOGICAL RECORD FOR MONTH OF DEC. 1901

Temperature mean for the month, 72.1; normal, 71.5; average daily maximum, 77.4; average daily minimum, 67.1; mean daily range, 10.3; greatest Anti-Saloon Men daily range, 19 degrees; least daily range, 3 degrees; highest temperature, range, 3 degrees; highest temperature, \$2: lowest, 59.

> Barometer average, 29.923; normal, 29.970 (corrected for gravity by -.06); highest, 30.17 on the 31st; lowest, 29.73, on the 19th; greatest 24-hour change, 0.23, I. e., from any given hour on one day to the same hour on the next; lows passed this point on the 10th and 23d; highs on the 4th, 20th and 31st. In the October report the following remark was made: "It will be int resting to note whether seven successive months of low barometer will be fol-lowed by unusually heavy rains." The report below will show whether this

& Cooke, and the speakers will all be sea-level to 34.05. January 1, 1901, it business men.

The early morning meeting will be lowering of the wells has come to a stood at 34.00. It would seem that the lowering of the wells has come to a

no rain gauge at that point; and Lau- K pahochoe reports 40 laches for two A

were about the 8th and 24th, both pre-ceded by heavy swell, and followed by low dew-point. The north wind evi-dently precipitated the terrific downpour on North Hilo. There was lightning reported from Hawali for the 8th, 9th, 13th, 24th and 25th. Maui, on the 8th Snow fell on Mauna Kea and Mauna Loa on the 8th and 24th; on Haleakala on the 8th or 9th. Earth-THE ISLANDS quake reported at Hilo, 7:30 p. m. on the 2nd. CURTIS J. LYONS, Territorial Meteorologist.

lication will not be very expensive or handsome, it is expected to make up for any shortcoming in the wealth of for any shortcoming in the wealth of good things it will contain, which will be of untold benefit to the Territory. There is a lamentable lack of knowledge concerning the "Paradise of the Pacific" in the Eastern States, which it will take a propaganda of education to correct, and the handbook planned by Secretary Cooper will do much towards correcting this ignorance.

If possible, this handbook is to be published annually, and future secretaries will be expected to continue the work.

### Mr. Dorsey, Expert, Is Coming to Hawaii.

Jared G. Smith, chief of the Agricultural Experiment Station, has been notified by A. C. True, director of Experiment Stations at Washington, of the intended visit to Hawaii of Clar-ence W. Dorsey of the Bureau of Soils. How soon this visit will be made is not known, as Mr. Dorsey will first conclude his examination of the soils of Porto Rico, though he may be expected in Honolulu within a few months.

The contemplated survey of soils in Hawali is of the greatest importance to to Mr. Smith a few months ago inquiring whether, in his opinion, such a study was needed here, and in reply Mr. True was notified that the survey might be carried on with profit to the sugar and coffee and general agricul-tural industries of the islands.

Such a survey, as it is the intention of the Bureau of Soils to make in the Territory, is exceedingly valuable. It will cover the entire group and a soil 17 map of each island will be made sep 27 arately. These will show in colors the various sorts of soils making up whole, its depth, and to wnat crop it is best adapted. For instance, there are probably thousands of acres of sugar lands in the Territory which are unde veloped. The survey will show exactly where each section of sugar land is los.42 cated, where the best coffee land can be found, and what soils are best for the cultivation of small farm products

Jared Smith stated yesterday that 9.52 9.60 such a soil survey would be of more value to Hawali than to the average 5.29 State, because the lands here are of so 3.33 many different kinds; broken up int 9.33 many different kin 1.59 ridges and valleys. 5.76 The sugar men

The sugar men now make chemical analysis of the soil, but this does not take into consideration anything but the particular land which it is proposed 14.14 to cultivate. The physical analysis to cultivate. The physical analysis to cultivate. The physical analysis to compare the compared to cultivate. The physical analysis to compare the compared to cultivate the compared to cultivate. The physical analysis to cultivate the compared to cultivate. The physical analysis to cultivate the compared to cultivate. The physical analysis to cultivate the compared to cultivate the compared to cultivate the compared to cultivate. The physical analysis to cultivate the compared to cultivate the compared to cultivate the compared to cultivate the compared to cultivate the cultivate the compared to cultivate the 31 have never been opened, or whose cultivation has never been attempted.
While it is hardly to be expected that the mountainous regions will be included, yet it is the intention to sur vey them to such heights as a successful cultivation of any crop whatsoever 62 might be attempted.

In the field classification of soils all features are taken into consideration which appear in any way to influence the relation of soils to crops. The class-ification is based mainly upon the physiification is based mainly upon the physical properties and condition of the soil as determined by the soil expert, but it is not based solely on this, and any chemical feature, such as deposits of mail, of highly calcareous soils, or of highly colored soils, is considered, as well as the character of the native veretation and the condition of the crops. The topography of the country is often a very safe guide in outlining the boundaries of soil conditions, and such soil maps will be made of Hawaii. They will be to a scale of one inch to a mile, local variations in the soil of less than one-fourth of a mile in extent are generally ignored, unless this variation constitutes a very prominent feature, such as a strip of meadow land along a stream or unless there are a number of small areas by which a certain character is street to which a certain character is given to the

Resides a soil map, an underground

TRANSACTIONS

This chart will show all the sources of water supply in the Territory, and will be extremely valuable. A chemical analysis of soils will also be made, electrical apparatus being used for the purpose. Borings will be made all over the Islands, and the soil will be studied be-Islands, and the soil will be studied be-neath the surface, also, 45 ascertain its physical properties.

Clarence W. Dorsey, who is to make be soil survey in Hawaii, is in charge the soil survey in Hawaii, is in charge of the western division of the Bureau or Soils, the dividing line being the Miss's-sippi river. He will probably be accompanied here by several subordinates to assist in the work. The expense of this survey will be borne by the National government. It can be done at a very moderate cost; from thirty to forty cents her acre is the average. The Bureau of per acre is the average. The Bureau of Solis is one of the new departments of the Agricultural Department, having been established last July. According to a report recently made by Mr. Dorsey, "the object of the soil survey is to class-ify and map the soils according to any condition which might influence the char-

desire for the delivery of the charter, vital statistics, election returns, laws, etc. There will be one better pleased than these who have so long struggled to see sheeth of the various forms of got the carriers. Attention will be paid also to the agricultural and manufactory and its advantages as a place of residence, and in fact he bandbook will centain the answer to any question which are the finding of the carriers of the United States and elsewhere, and of late these requests for information have become so numerous and complete reply to all. Secretaries of the public institutions and private corporations within the State. They also often make requests for similar publications from this Territory, but there is nothing which answers the purpose.

A CURE FOR LUMBAGO.

# SAVE YOUR SK

the Skin and Complexion.

To preserve, purify, and beautify the skin, and prevent pimples, blotches, blackheads, redness, roughness, yellow, oily, mothy skin, chapping, and many other forms of skin blemishes, no other skin or complexion soap is for a moment to be compared with CUTICURA SOAP, because no other soap reaches the cause, viz., the clogged, irritated, or inflamed condition of the PORES

Humours and Dandruff.

Cleanse the scalp and hair thoroughly with a warm shampoo of CUTI-CURA SOAP, rinse with warm water, dry carefully, and apply a light dressing of CUTICURA, purest of emollients, gently rubbed into the scalp. This simple, refreshing, and inexpensive treatment will clear the scalp and hair of crusts, scales, and dandruff, soothe irritated, itching surfaces, stimulate the hair follicles, supply the roots with energy and nourishment, and make the hair grow upon a sweet, wholesome, and healthy scalp, when all else fails.

How to Make the Hands Soft and White in a Single Night.

Bathe and soak the hands on retiring in a strong, hot lather of Cuticura Soar. Dry thoroughly and anoint freely with Cuticura Ointment, the great skin cure and purest of emollients. Wear during the night old, loose kid gloves with the finger ends cut off. For red, rough, chapped hands, dry, fissured, itching, feverish palms, shapeless nails, with painful finger ends, this one night treatment is simply wonderful and a blessing to all afflicted with sore, chapped, rough, or tender hands.

Cuticura Complete External and Internal Treatment for Every Humonr,
The Set and soften the thickened cuticle, Curricura Content, to create and soften the thickened cuticle, Curricura Content, to cool and cleanse the blood. A Single Ser is otten sufficient to curre the most torturing, distingring, and hamiliating skin, scaip, and blood humours, with loss of hair when all eight fails. Soid throughout the world. Aust.
